Empowering creativity and developing collaborative skills.

Encourage children to think critically and work together to get results.

Team Together emerged in response to questions from teachers: how can we get children talking in English? How can we help children to work together effectively, or think critically? How can we ensure they learn what they need for their exams? And most of all, how can we help them to love learning English? **Team Together** answers these questions by appealing to children's curious natures and desire to communicate.

Children love puzzles and making connections – both key elements of critical thinking – and **Team Together** is awash with puzzles, challenges and connections to be made! Children identify mistakes in pictures, find the odd ones out, and figure out the endings to each story. Through the CLIL syllabus, children make connections between language and their knowledge of the wider curriculum. At every stage, children are challenged to think critically through activities that grab their attention.

Children love being creative and working together. From acting out stories and working collaboratively on projects, to tongue twisters and crazy classroom rules: **Team Together** empowers children to use their creativity and develop their collaborative skills.

And of course, children love talking! With **Team Together**, children encounter authentic contexts that feel relevant and interesting, and scaffolded activities that build confidence in speaking. From giving opinions and playing guessing games to ordering drinks in a café and presenting their projects, children become confident communicators with **Team Together**.

Pearson Tests of English Young Learners: Practice Tests

Practice and exercises to prepare kids for the PTE Young Learners test

PTE Young Learners is a fun English language assessment for students aged six to 13, delivered by Edexcel, the UK's largest examining body. It tests a young learner's ability to use structures and functions in realistic contexts and, later on in the series, tests their ability to use language to carry out specific communicative tasks, with an emphasis on real-life scenarios rather than on knowledge of specific language items and vocabulary.

How can we best prepare students for the world of work?

Education is not just about preparing students to succeed in specific subjects, but also about preparing them to contribute to society.

A key part of this is what is often called 'career skills', or those skills which will make our students valued employees and colleagues.

In these fast-changing times we cannot be sure exactly what kind of jobs and workplaces our students will find themselves in, but we can equip them with the kinds of skills and attributes that will enable them to succeed throughout their working lives.

In a situation where two equally well-qualified candidates are being considered for a job or role, it will be the candidate with the most developed workplace skills who is most likely to succeed.

Some of the most important career skills we can teach are:

- communication skills
- planning, organising and prioritising work
- leadership and the ability to work well as part of a team
- decision making and problem solving
- managing difficult or tricky conversations

As English teachers, we need to consider how the teaching of these skills can be integrated into our regular classroom routines, meaning that we are preparing our students in the fullest possible way for the challenges which lie ahead.

Speakout Digital

Speakout Digital is a general English course from A2 to B2 supported by an exciting range of digital tools, including BBC videos to bring an authentic experience to learning English.

The videos give students the opportunity to hear language as it is really spoken in daily life, but at the same time they are a vehicle for developing language skills, inviting students to think critically and express opinions and offer personal reactions. While speaking is a particularly strong feature of the course, listening, reading and writing skills are developed and strengthened throughout the course.

The student book section ends with a special reading bank, introducing students to extracts from classic works of literature and biographies of famous people in history. Each piece is linked to the themes of the unit topics and introduced by **Thinking Routines**. This methodology helps students formulate ideas and guides them to express those ideas. At the same time, grammar and vocabulary are recycled and reinforced. Their curiosity spiked, students will be able to read the complete book by accessing the **digital library**.

In addition to the Readers, **Speakout Digital** has an exceptional range of digital components:

- The *Libro Liquido*, ideal for independent study, online or offline, a digital format of the book that adapts to any device and screen size. It has unique functionality to support students with dyslexia, changing text font, size and background with a simple click.
- *MyApp Pearson* – download the App and access the audio and video content via the QR Codes.
- *MyEnglish Lab* is a language practice tool that can be used to assign homework or remedial work, or that can simply be used for self-study.
- *Active Teach* – a USB key which contains an interactive eBook version of **Speakout Digital** that can be used on an interactive whiteboard and an enormous range of extra support materials, including Tests and Speakout Extra.
- *Teacher's Book* with tests and Active Teach: the guide for the teacher, with an introduction to the methodology and the didactic programmes divided by units and skills, with notes, suggestions and extra activities. In addition to that, the Active Teach, the DVD-ROM that can be used with the LIM and that contains extra audio materials, interactive exercises, evaluation activities and tests, besides various additional tools also for students with learning disabilities.

Speakout 2nd Edition

The best place to learn a language is in the real world

Speakout brings authentic language and real-world tasks into your classroom. Its tried and trusted approach trains learners to communicate naturally in English as it's really spoken, using videos, audio, and texts from the BBC.

Designed to get students thinking and speaking, **Speakout** exposes students to the language they'll come across outside the classroom with the practice they'll need to use it effectively in their lives.

Now with two new levels, it provides new content and more learning opportunities to help students through the intermediate plateau, and exposes them to extra idiomatic language needed at advanced level.

Why challenge is good for building language

Speakout uses authentic material which really engages learners both cognitively and effectively. It is challenging for them—learning a language is difficult, and it's really hard to understand fast spoken English.

Speakout supports them and builds their confidence in their ability to deal with spoken language. Learners enjoy the challenge, and they really enjoy the material because it is satisfying for them to know that the material hasn't been written especially for the language classroom. It feels more real.

When teachers and students first start using **Speakout**, they often comment on this, saying that the course is more challenging than other courses at the level. We have found that ultimately both teachers and learners appreciate the challenge, that they feel better prepared for dealing with “the real world” than they would if they only had exposure to graded material. At the same time, within a level and a unit we vary the difficulty of texts so that some are relatively easily accessible to students at that level.

Our main focus is to get the students speaking and most teachers comment that their students talk a lot during the lessons (because they have something they genuinely want to speak about). They are given lots of opportunities to express their own ideas and opinions. Also, we try to give the learners really useful language, building their grammatical and lexical competence.

Roadmap

The right route for every learner

Roadmap is practical and communicative, and gets students talking with topics and tasks relevant to their world.

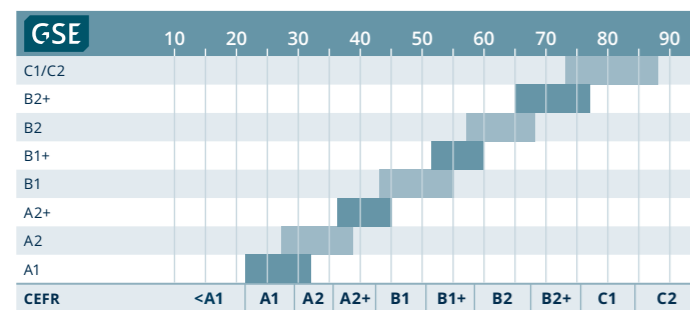

Each lesson starts with a communicative goal, then builds the language and skills to achieve it.

The unique twin-track approach allows you to adapt the material to your learners' needs and teach the language and skills they need to progress. So, in the fast-track route, every class covers essential language and speaking skills, while the extended route adds in-depth skills training in reading, writing and listening.

Comprehensive teacher support makes lessons easy to organise and fun to teach, however much time you have to prepare.

Teaching sub-skills, not just practising them...

Language is generally divided into two main areas: language systems (grammar, lexis, phonology and discourse) and language skills (listening, speaking, reading and writing). The latter of these can be further divided into sub-skills. These are things we do in our first language usually as subconscious processes.

For example, if we're listening to an airport announcement, we'll selectively listen out for keywords and numbers related to our flight (destination, time, flight number, gate, etc.), a sub-skill known as scanning. If we're reading a summary of a talk in a conference programme, we'll skim over the description to get a general idea of what it's about. Likewise, we know how to interrupt a conversation politely to join in.

These sub-skills are things we generally take for granted in our first language. However, when learning another language, it's easy to become overly focused on understanding all the language or using the right words and phrases. As a result, these sub-skills often get overlooked.

To truly develop these skills and sub-skills with our learners, we need to teach specific strategies to help them develop. By focusing on teaching strategies, skills and sub-skills, we can help our students become more confident and proficient language learners.

Independent learners are more engaged

Students who are actively involved in deciding what and how they learn are typically more engaged and motivated. As independent learners they display an increase in confidence, a higher level of awareness of their own abilities, and they also tend to improve their academic performance.

Developing independent learning is especially relevant when preparing students for exams, as they require a lot of work and motivation. Yet contrary to what you might think, independent learners also need support and direction from their teachers.

Gold Experience has a number of resources that can help you develop independent teens. Each unit has a dedicated section to help students become more independent learners: to self-reflect and give better feedback to peers, to understand themselves better as learners, their strengths and weaknesses, so they can set themselves realistic, useful, personalised goals.

Other tools **Gold Experience** provides include clear learning goals and models for success, getting students to analyse why answers are right, project work that involve decisions about the learning process, scaffolded tasks to develop the skills they need to improve their writing, and making available a number of resources for self-study.

Effective or restrictive?

Depending on your standpoint, 'teaching to the test' is either an effective way of ensuring that classroom teaching conforms to a standardised curriculum, or it is a restrictive pedagogical shortcut designed to ensure that students pass their exams.

One argument against it goes that while students may come away with reams of memorised materials and certain academic skills, they are left without important listening, speaking, and everyday communications skills.

However, a considered and student-centered curriculum with exam-based assessments can be a highly effective framework for learning. The target skills and communicative goals laid out in an exam course can help learners measure progress. They can also instill a sense of achievement and provide meaning and motivation in every class.

The difficulty for teachers though is how to design an exam-focused curriculum that tests useful skills and motivates students, and how to select learning objectives that align with student level and ability.

Gold removes that difficulty. It balances Cambridge English exam preparation with communicative aims in a fun and personalisable course. It helps students by increasing their confidence, competence, and key skills without over-pressuring them.

From the test developers

Pearson Test of English (PTE)

PTE General is designed to reward positive achievement in English language learning. The test is an assessment solution as it is intended for learners of English who are speakers of other languages (ESOL). PTE General integrates all four skills (listening, reading, speaking and writing) and focuses on assessing the ability of communicating in English, rather than test-taking skills.

WHY CHOOSE PTE GENERAL?

Prove your skills to employers and universities with a prestigious international English language qualification.

- Accepted by hundreds of schools, universities and government bodies around the world.
- Measures real-world English skills, using the type of language you will encounter in a classroom or social setting.
- Test format allows the opportunity to express yourself and demonstrate your skills with familiar scenario-based activities like writing messages, understanding newspaper articles, or participating in a conversation.

PTE General focuses on assessing the ability of communicating in English, rather than test-taking skills. The tasks in the test are a natural continuation of what happens in the classroom, giving test takers the opportunity to perform at their best.

The test consists of two parts: a written paper and a spoken test, and assesses four skills: listening, reading, speaking and writing.

- The written paper tests listening, reading comprehension and writing skills and is marked by external examiners in the UK.
- The spoken test assesses speaking skills and is also marked by external examiners in the UK.

Assessment of communicative ability

PTE General is a scenario-based English language test designed to allow students the freedom to express themselves, show what they can do and how well they can use English.

Realistic and familiar tasks

The test uses real-life material and tasks, such as writing messages, understanding talks and newspaper articles, or participating in conversation.

Positive testing experience

Through a variety of tasks that are relevant and authentic the test will help students identify their strengths and track improvement and success.

PTE General certificates do not expire. English language learners are encouraged to seek opportunities to practise the language and confirm their progress regularly.

Skills beyond qualifications

Being employable is often considered to be based on having the right professional qualifications and work experience.

These elements are still essential, so what's new? Why do we keep hearing the term 'employability skills' nowadays and what are the implications for the business English classroom?

The world of work continues to evolve: according to the World Economic Forum we are living in the era of the Fourth Industrial Revolution. Tough employment markets and rapid technological changes mean that employers are looking for candidates with specific combinations of skills whatever the position.

Some of the most sought after employability skills include: effective communication skills, working well in teams, having proven problem-solving abilities and showing initiative.

Business Partner is written with these skills in mind. There are dedicated communication skills lessons, projects and business workshops that develop (not just practise) these skills in every unit. Dramatised videos in the communication skills lessons encourage learners to reflect on the effectiveness of their own communication styles and the styles of others. Examples include push vs pull factors in influencing people and ways of giving and receiving feedback. Projects and business workshops offer opportunities for students to work on realistic case studies and show their initiative while solving business problems with their colleagues.

Business Partner helps students develop a marketable mindset at the same time as they develop and improve their English.

Choose **Business Partner** if you want to:

- Learn about real business issues through authentic content
- Build communication skills with an innovative video training program
- Get practical training in functional business skills
- Pick and choose lessons with the modular unit structure
- Work on realistic case studies with workshops in each unit

English language classrooms have changed greatly since the first edition of this book was published, more than thirty years ago.

Advances in the technology available to teachers and students, both inside and outside the classroom, have brought about some of the most noticeable of these changes.

However, the fundamental questions of how best to teach and learn a language remain the same. This book is informed by past theory and practice and by books and articles written by teachers and researchers in recent years. It examines current issues, such as the lingua franca core, teaching 'unplugged', and the rise of digital testing and marking, amongst many others, and provides a snapshot of the state of English language teaching today.

By sharing the knowledge of how good teachers think and work, we can ensure that we help our students to communicate as effectively as they can.
