Table of Contents

Chapter 1: The analysis framework and financial statements	1
Aim of the chapter and learning objectives	1
Capital markets and the role of valuation and securities analysis	1
Introduction to stylised financial statements	5
Accounting relations governing the stylised financial statements	16
Chapter summary	19
Key terms	19
Test your knowledge and understanding	21
Works cited	21
PART 1: THE FRAMEWORK FOR ANALYSIS	22
Chapter 2: Financial analysis: performance evaluation	22
Aim of the chapter and learning objectives	22
Introduction	22
Accounting-based measures of performance	23
Market-based measures of performance	28
Accounting-based versus market-based performance measures	30
Present value of abnormal earnings	31
Accounting choices, accounting-based performance measures and valuation	32
Chapter summary	33
Key terms	33
Test your knowledge and understanding	34
Works cited	34
Appendix	35
Chapter 3: Financial analysis: the determinants of performance	36
Aim of the chapter and learning objectives	36
Introduction	36
Financial analysis: time-series and cross-sectional analysis	37
Business profitability (RNOA)	37
Abnormal (residual) operating income (AOI)	42
Determinants of business profitability	45
Business profitability and free cash flows	48
Chapter summary	
Key terms	49
Test your knowledge and understanding	50
Works cited	50
Appendix	51

Chapter 4: Financial analysis: the determinants of performance	52
Aim of the chapter	52
Learning outcomes	52
Essential reading	52
Introduction	53
Financial analysis: time-series and cross-sectional analysis	53
Business profitability (RNOA)	54
Abnormal (residual) operating income (AOI)	58
Determinants of business profitability	61
Business profitability and free cash flows	64
Chapter summary	65
Key terms	65
A reminder of your learning outcomes	66
Sample examination questions	66
Appendix	67
Chapter 5: Prospective performance evaluation and valuation	69
Aim of the chapter	69
Learning outcomes	69
Essential reading	69
Works cited	69
Introduction	70
Strategy analysis	70
Institutional features of financial reporting	76
Accounting analysis	78
Chapter summary	81
Key terms	82
A reminder of your learning outcomes	82
Sample examination questions	82
Chapter 6 Prospective performance evaluation and valuation	84
Aim of the chapter	84
Learning objectives	84
Essential reading	84
Further reading	84
Works cited	85
Introduction	85
Forecasting: simple forecasting and full information forecasting	86
Simple forecasting techniques	86
Empirical evidence on the patterns of accounting measures	91
Applicability of simple forecasting for valuation	96
Full-information forecasting	96
Chapter summary	105
Key terms	106
A reminder of your learning outcomes	106
Sample examination questions	106

PART 2: SECURITIES VALUATION	108
Chapter 7: Securities valuation	108
Aim of the chapter	108
Learning outcomes	108
Essential reading	108
Further reading	109
Works cited	109
Introduction	109
Discounted cash flow method	110
Dividend discount method and the discounted cash flow to equity method	118
Abnormal earnings method	121
Abnormal operating income method	126
Advantages and limits of AOI and EVA methods	129
Comparison of methods: empirical evidence	130
Chapter summary	134
Key terms	134
A reminder of your learning outcomes	135
Sample examination questions	136
Chapter 8: Implications for price-to-earnings and price-to-book ratios	167
Aim of the chapter	137
Learning outcomes	137
Essential reading	137
Further reading	137
Works cited	138
Introduction	138
Drivers of price-to-book (PB) ratios in efficient markets	139
Drivers of price-to-earnings (PE) ratios in efficient markets	141
Implications of PE and PB ratios in efficient markets for current and future performance	143
Joint distribution of PE and PB ratios	145
Implications of strategic taxonomy for PE and PB ratios in efficient markets	145
Valuation using the ‘method of comparables’	147
Chapter summary	151
Key terms	152
A reminder of your learning outcomes	152
Sample examination questions	153
Chapter 9 Financial information and stock prices	154
Aim of the chapter and learning objectives	154
Introduction	154
Usefulness of earnings to investors: the empirical evidence from capital markets research	155
Methodological issues	155
Empirical evidence	157
Earnings response coefficients	159
Competing hypotheses to explain the earnings response conundrum	160
Fundamental information analysis and stock prices	163
The interpretation of fundamentals by the analysts’ community	163
Methodological issues	166

Empirical evidence on fundamentals	167
Chapter summary	169
Key terms	170
Test your knowledge and understanding	170
Works cited	171

Chapter 10: Returns to fundamental analysis **172**

Aim of the chapter and learning objectives	172
Introduction	172
Methodology	172
Returns to contrarian strategies	173
Returns to accounting analysis	176
Implications of current earnings for future earnings	176
The apparent demise of the accruals anomaly	178
Initial public offerings	178
Implication of current quarterly earnings for future quarterly earnings	180
Returns to financial statements analysis	182
Fundamental analysis and market efficiency	186
Chapter summary	187
Key terms	187
Test your knowledge and understanding	188
Works cited	188

Chapter 11: Returns to technical analysis **190**

Aim of the chapter and learning objectives	190
Introduction	190
Methodology	191
Returns to contrarian strategies	191
Returns to momentum strategies	192
Reconciliation	198
Time-series properties of stock prices	201
Technical analysis and market efficiency	202
Chapter summary	203
Key terms	204
Test your knowledge and understanding	204
Works cited	205

Appendix 1: Solutions to numerical activities **207**
