

MAKE A RAIN CLOUD

1 Listen and read. 

Clouds are made of small droplets that form when vapour cools.

2 Listen and... make your rain cloud! 

You need:

- a jar 
- a plate 
- some ice cubes 
- tap water 

Match the pictures to the texts.

- 1 Put some water in a jar.
- 2 Cover the jar with a plate of ice cubes.
- 3 The vapour goes up from the water.

- 4 The vapour meets the cold air from the plate and condenses. You can see a rain cloud!

KEY VOCABULARY

droplets *goccioline* • to condense *condensare*
 • to cool *raffreddare* • vapour *vapore*
