

PHOTOSYNTHESIS

1 Listen and number.

Humans produce carbon dioxide: this is the gas that we breathe out. Oxygen is the gas plants make and humans breathe in. Our bodies need the oxygen in the air to stay alive.

 <p>A The green substance in leaves, chlorophyll, makes photosynthesis happen. <input type="checkbox"/></p>	 <p>B Plants get the energy they need to live from water, carbon dioxide and sunlight. <input type="checkbox"/></p>	 <p>C Photosynthesis is the name of this process. A waste product of photosynthesis is oxygen. <input type="checkbox"/></p>
---	---	---

2 Look and circle.

Circle:

- **red** what plants take in
- **green** what plants give out

<p>KEY VOCABULARY</p>	<p>carbon dioxide <i>anidride carbonica</i> • chlorophyll <i>clorofilla</i> • leaves <i>foglie</i> • oxygen <i>ossigeno</i> • photosynthesis <i>fotosintesi</i> • substance <i>sostanza</i> • sunlight <i>luce del sole</i> • to breathe in/out <i>inspirare/esprire</i> • waste <i>rifiuto</i></p>
