

MAKE EARTH A BETTER PLACE

1 Listen.

Our waste has a big negative impact on the Earth. Day after day this waste causes pollution in the air, in the water and in the ground.

Plants and animals are in danger!

You can help to defend planet Earth by recycling, that is putting waste in different recycling bins.

- Paper (**A**) is recycled and can be used in the kitchen, in the toilet, at school etc.
- Plastic (**B**) is recycled and can be used for car parts, clothes, containers, furniture, toys etc.
- Aluminium (**C**) is recycled and can be used for pans, toys, bikes, sports equipment etc.
- Glass (**D**) is recycled and can be used for tiles, containers, insulating material etc.

These bins are emptied at an “ecological island”, a place where waste is cleaned and transformed to be used again to make new materials.

A

B

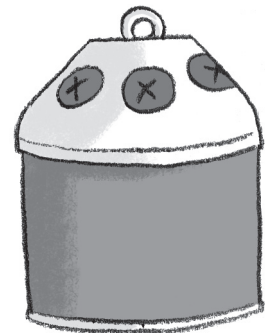

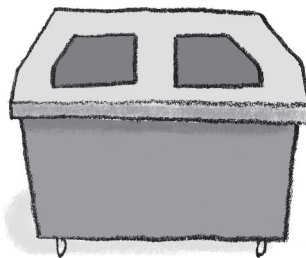

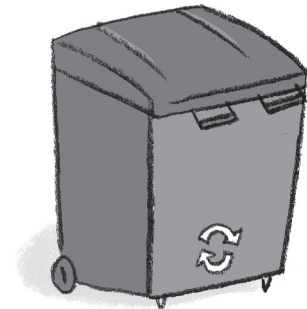

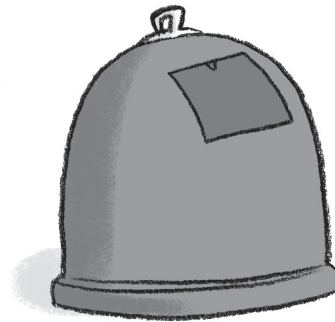

C

D

2 Cut and glue.

KEY VOCABULARY

bins *secchi* • ecological island *isola ecologica* • furniture *mobili* • ground *suolo* • help *aiuto* • insulating material *materiale isolante* • pans *padelle* • pollution *inquinamento* • tiles *mattonelle* • to defend *difendere* • to recycle *riciclare* • waste *spazzatura*
