

MEASURING WATER VOLUME WITH COMMON OBJECTS

1 Listen, read and... do! 

You need:

- a glass 
- a coffee cup 
- a detergent cap 

- a small basin with water in it 

KEY VOCABULARY

- amount *quantità*
- how many *quanti*
- water volume *volume dell'acqua*

1 Compare the amount of water that you can pour in a glass with the amount you can pour in a coffee cup. Then write your results in table **A**. How many coffee cups to fill a glass?

2 Compare the amount of water you can pour in a coffee cup with the amount you can pour in a detergent cap. Then write your results in table **B**. How many detergent caps to fill a coffee cup?

3 Compare the amount of water you can pour in the detergent cap with the amount you can pour in the glass. Then write your results in table **C**. How many detergent caps to fill a glass?

TABLE A		TABLE B		TABLE C	
glass	numbers of coffee cups	coffee cup	numbers of detergent caps	glass	numbers of detergent caps
1	1	1
